

1794

C2a

.1 I (Ill in Br as I)

⑩ 9 III, IV, or V strong clack

No clack marks

Crack thru tops of ERTY is present

No break in denticles over BER

⑪ 10 III^{STET}, IV, or V

look at hemination heavier clack than 9
Minor, but large, hem

.2 V (Ill in Br as V)

12 11 I

Heavy clack marks, including hair

Crack thru ERTY extends to r of Y

Crack from rim to r top of Y toward
nose not visible

C2b

⑬ J 12 III

2b.1 Too low-grade to determine
die state

14 13 II or III

15 314 IIa or III

1794 C3a

.3 In II (Ill in Br. as II)

- (16) 14 ^{Some dash behind cap} II ^{Rim crumbling over ERT, bulge r of}
^{Yes, bulge, but left date, dash marks, all seem same}
^{no bulge r of date? FW as 2a.2.}
- (17) 15 ^{Bulge stronger} I or II ^{than 14, dash, less} LIBERTY all clearly double cut
^{off-center NOT signif}
- 18 315 not described

C3b

- (19) ^J 16 nd OK

1794 C4a

20 17 IIa n III

(21) 18 I *Compare die state with .6 Earlier, and clearly so, no bulge*

22 19 III

23 20 VII

(24) 21 VII a *Compare die state with .10 Essentially the same*

C4b

(25) 22 I OK LL

.5 III (Ill in Br as III)

all of the clash marks of III, and none of the additional ^{three D for in} cm, crack, or rust marks of IV

But does have clash mark thru I of UNITED. Has cracks thru tops of UNITED, SO, and AMERIC and AT

(16) IIa n III Has D clash mark behind cap Has some leaves in hair.

Has some trace that could be clash marks on reverse. And bulge L of date strong

.8 III Same as .5

.9 VI But I think V-VI cracks develop before IV, so that IV is the last state before VII

(.10) VII As Deser.

1794 C5a

26 23 I as .2

.2 I No clash marks
Four denticles over R₂ slight crumbling

(27) 24 ~~III~~ II or III ^{does it show}
^{(6 or 7) denticles}
^{first "only know} clash visible but coin rough
^{of 3 with clash"} rim chipping
^{over ERT?}
C5b

(28) J 25 nd OK LL .4 I Exactly like .2

240

17984 C6a

Fw error marks on head. Double brochage off center?
Do you agree?

(29)

26 nd letter. Does it have a bulge between first + bulge right of 4?
Yes

C6b

(30) J 27 II of III OK LL

3 II or III B/E cracks or

lie scratches. Substantial dash marks in front of mouth and neck.

Number of denticles involved in crumbling over BER not clear, but several

Bulge to right of 4 is faint, if it exists

26 Yes, double brochages of denticles on forehead. No dots on rear
Has bulge. Has defect BE. State III

1794 C7

.4 (Ill in Bas I) I

Clashed dies not visible on Obv

Heavy die crack on Rev to leaves,
but not further to H.

(31) 28 IIa or (III)

Does it have
clash marks
described in
Br for III?

Yes, some. As described in catalogue, but not for TATE
area clashes, if they are different from the lesser.
My guess; This is all of 'em

- 33 (32) 29 ~~as does. Hard to be precise because of condit~~
 III or III or IV ~~Cracked rim to T, but not to wreath~~
 No obs. crack ~~at cap of IV~~ ~~2 IV?~~ Clash marks ~~not clear~~
- 32 (33) 30 I or II or III
 No described for II. Condition not great
 However, new crack from rim (between denticles) through second T to wreath. No Obs crack of IV

(34) 31 IV

(35) 32 IV_a

(3) II_a or III (Ill in B₁ as III)

No trace of crack through T.
 Many reverse clash marks, but no
~~evidence of 9 or 4 at 50~~ Yes, I can now see them!

29 } How do they compare with each other and .3?
 30 } Crack thru T ~~Virtually the same, but~~

31 } How compare with each other and .2?
 32 } Clash marks and crack thru T

31 has same state of crack under T as .2,
 but clash marks are clearer, probably because
 of pitting on 2. A better example for showing
 the die state.

32 is slightly later than 31 and .2 (per JRob)
 Ⓢ crack extends below leaf. Clash marks
 not as visible, as in .2

1794 C9

- (36) 31 33 IV Nearly as late as 34. 3 IV (Ill in B as IV) crack
 Reverse under fraction ^{some faintly to r. of Y. Rev lines as in 34}
 but rev ^{see NOT as bunched.} new weak at E of CENT
- (37) 38 34 IV a V 4 I No obverse die crack
 See description
 No rim crumbling left of fraction
 FW "latest we had ever seen"
 compare with .3

- (38) 36 35 I As in B? Yes - no ob crack
.5 III (probably) Die crack on obv.

34 Strong crack thru cap to hair Reverse too worn to tell if
 clear crack IBERTY to r. of Y rim break exist left of fraction
 light crack above & left of L between BUT IS IT AN ELECTRO?
 level of top of L (and cap) and denticles
 Rev cut under fraction in dents
 Rev bunched NO, IT IS NOT

Envelope says (or V?) and faintly r. of Y
 "Error coin. Struck .6 IV ~~that~~ as .3. Cracked thru IBERTY ^
 thru reg. Mint red" Reverse crumbling in denticles left of fraction.
 Also has lines in rev dents + faint cracks TE
 Half cent somewhat weak.

1b.1 II (or III) Faint crack thru cap
 Cannot see denticles l. of fraction
 No crack thru IBERTY

1b.2 Too low-grade to identify die state

- 34 Is it later than 33, .3, .6? [Y, obv crack, cr., ^{rim weakness} at E
 35 Is it earlier than .4?

1795 C1

(39) 36 (I, II, or III) .2 II
to it, I?
I think so. No trace in depth at 60,
but enough of 3 III
to make a slight question.

1b.2 +lg

1c.1 +lg

SUNDAY in FEB

1795 C2a

(46)⁴⁵ 43 II III or IV

Reverse double struck (slight, but clear)
no RICA crack. Very strong MER bulge.
(Is that because of wear?)
Clip medium size

C2b

2b.2 II or III Cannot see break

(47) J 44 I or II IV!
Bulge only medium, but RICA crack is clear.

over D. Swelling there MER is heavy. Some trace of bulge before face

2c.1 I

C2a again!

(44) 41 IV Crack thru RICA. Centering does not permit clear view of dentil crumbling at ED

(45) 42 I or II Perhaps later than I or II. Strong MER bulge, no crack at RICA

Dunno. Three dents only for break. Swelling at MER is medium. But RICA crack is clear - not for comparison with other coins strong

1795 C3

48⁴⁷ 45 II

.4 Late I or Early II Obverse
bulge not pronounced. Reverse slightly weak
in center, but not strongly so. Could be
a result of higher grade

- 436 1800 C1 Nice, but not exceptional "MS 60+ Brown"
Some slight marks and/or rub
- 441 1804 C8 State III MS 60+ Brown
Very slight rub on high spots - new surfaces dull
and not smooth
- 442 1804 C13 State \pm MS 63 R+B
lovely - lots of red, but of course I just bought
an even nicer one. This has long, fine scratch
on chest and neck.
- 447 1807 C1 MS 63 R+B
Weak denticles, particularly new. More B than P, and
the R looks a little unnatural. No wear. Not great
- 448 1808 C3 MS 60 Br.
Quite extensive slight rub on obv. Not great.
- 452 1825 C1 MS 63 Br.
Some rub O+R. Probably not better than mine.
- 470 1837 Taken Uncirculated. Rare. Not nicer than mine
GOS
- 471 1842 2nd Roster Not that nice H 64 Brown

- 473 1845 2nd Rest OK not great, seems heavy
- 478 1852 Rev of 1856 Nice color, glittery, PF 63 R+B
but with an obv. scratch.
- 479 1852 Rev of 1856 Nice PF 63 Brown
- 439 1803 C 1 State I PFGS MS 62 Brn
OK. Not super.

part
look at 6
1793 C4 with lamination.

↓ C1a

⑧ 7 IV
Does this have
IBE crack
No. Slight crumbling
marks at AME. II on
C1b

⑨ J 8 II or III

former, but lots of
detail

.2 (Illustrated in Br. as State I) Ia

Has reverse dash marks of II left of H

No obverse dash marks

Strong reverse lines at IT

No crack thru tops of IBE

No die crumbling in denticles over AME

.3 IIa? Slight ob. dash marks at lip

Clear rev. dash marks

Lines at IT not visible

No crack thru tops of IBE

Visible die crumbling over AME

.5 (DS) IIb? Dash marks O+R somewhat

stronger than on .3

IT lines gone, but dash marks in
that area

No crack IBE; visible crumbling AME

1b.1 Much too low-grade to identify
die state

⑥ ⑤ 1793 C4 AU50 (not fine) laminated Lamination area totally
rough, virtually no detail visible. Reverse unaffected
